1 day

Course Title

Microsoft® Windows Vista™: Level 2

Related Courses

- Microsoft® Windows Vista™: Level 1(M-VISTAL1, 1 day)
- Microsoft® Windows Vista™: New Features (MVISTANF, 1 day)

Aimed At

This course is designed for any knowledgeable worker or business professional with entry-level Windows Vista skills who needs to use more advanced Windows Vista networking, customization, and file-management features in the business environment.

Group Size

5-15

Prerequisites

- Microsoft® Windows Vista™: Level 1(M-VISTAL1, 1 day)

To ensure your success, we recommend you first take the above Element K course or have equivalent knowledge.

Course in a Nutshell

This course is the second and last in the series of Microsoft® Windows Vista™ courses. This course will provide you with skills that will help you manage some of the advanced tasks available in Windows Vista. In this course, you will familiarize yourself with advanced customization techniques and work with applications and programs in Windows Vista. In addition to this, you will also work with Internet Explorer 7.0, manage network communications and data, and enhance system performance.

Customize It!

Customize this course to your specific background and job requirements at little-to-no additional cost. We'll tailor the topics included in the course, the emphasis each topic receives, the pace of coverage, and the choice of hands-on exercises to suit your particular needs. If you have an interest in a particular area, let us know, so we can be sure to address it.

Learn How To

You will work with Microsoft® Windows Vista™ and learn to perform advanced tasks. Upon successful completion of this course, students will be able to:

- customize the Windows Vista environment.
- work with Windows Vista applications.
- work with Internet Explorer 7.0.
- manage network communication and sharing.

- backup and restore files and folders.
- enhance system performance using technologies available in Windows Vista.
